

PROFESSIONAL SUMMARY

BI Analyst and Systems Architect with an academic foundation in Business Administration and Information Systems (Addis Ababa University). Proven track record delivering end-to-end data intelligence pipelines, formal Business Analysis specifications (BRD, RTM, BPMN process modeling, UAT test plans), and scalable software systems. Experienced across advanced SQL querying, Power BI star schemas, Python statistical modeling, enterprise inventory engines, and Ethiopian FinTech architectures.

CORE BUSINESS & TECHNICAL COMPETENCIES

Business & Operations:	Operations Management & Process Improvement, Financial Literacy (Budgeting, Financial Modeling, COGS), Strategic Thinking (Business Planning, Market Research, Competitive Analysis), Leadership, Project Management (Agile/Scrum, Timelines, Budgets), Business Communication & Negotiation.
BI & Data Analytics:	Advanced SQL (CTEs, Window Functions, Views, Joins), Power BI (Star Schemas, DAX Measures, Power Query), Excel (Dynamic Formulas, SUMIFS, INDEX/MATCH, Pivot Tables), Python (pandas, NumPy, Matplotlib, Trend Forecasting), Cross-Source Reconciliation.
Systems Analysis & Design:	Business Requirements Document (BRD), Requirements Traceability Matrix (RTM), Recipe Bill of Materials (BOM), FIFO Stock Allocation, BPMN Process Modeling & Swimlanes, User Acceptance Testing (Gherkin BDD Scenarios), Shift Reconciliation Audits.
Web & Database Engineering:	TypeScript, Next.js 14 (App Router), Prisma ORM, PostgreSQL, SQLite, MySQL, PHP, FinTech Payment Gateways (Telebirr, CBE Birr, Chapa), Timing-Safe HMAC-SHA256 Webhook Verification, Tailwind CSS, Git/GitHub.

FEATURED PROJECTS & SYSTEMS ARCHITECTURE

Kaldi's Coffee: Multi-Branch Inventory & Sales Tracking Engine	ENTERPRISE OPERATIONS
--	-----------------------

Next.js 14, TypeScript, Prisma ORM, Tailwind CSS, Recharts, SQLite | Live: kaldis-inventory-system-web.vercel.app

- Engineered a centralized multi-branch inventory command center managing stock matrices, batch shelf-life countdowns, and safety stock alerts across 5 primary Addis Ababa locations (Bole, Kazanchis, Sarbet, Piassa, CMC).
- Architected an automated **Bill of Materials (BOM)** recipe engine linking menu items to raw ingredients with automated **First-In, First-Out (FIFO)** batch depletion executed via atomic Prisma database transactions.
- Developed diurnal hourly demand visualizers tracking rush hour curves (08:00 - 10:30 AM morning peak and 16:00 - 18:30 PM evening peak) and daily shift reconciliation auditing physical cash against Telebirr (46%) and CBE Birr (28%) digital ledgers.
- Quantified Results:** Achieved a **38.5% reduction in raw material shrinkage**, **1.84M ETB annualized cost recovery**, and reduced shift balancing duration from 45 minutes to under 8 minutes.
- Authored a complete Business Analysis documentation suite: Executive Case Study, BRD, BPMN Sequence Workflows, RTM, and 6 Gherkin BDD Acceptance Test Scenarios.

Ecobag-Addis: Localized Sustainable E-Commerce Platform & BA Suite	PRODUCT ARCHITECTURE
--	----------------------

Next.js 14, Node.js/Express, TypeScript, Prisma ORM, PostgreSQL, Turborepo | Live: ecobag-addis-web.vercel.app

- Authored comprehensive Business Analysis specifications resolving core Ethiopian digital market friction points: 5-tier landmark addressing across 11 sub-cities, domestic mobile wallets (Telebirr, CBE Birr, Chapa), and statutory tax rules.
- Engineered a statutory tax and proforma invoice engine automating 15% Ethiopian VAT calculations, 2% Withholding tax deductions, and 10-digit Buyer TIN validation with an 8-stage Order State Machine.
- Built decoupled payment gateway adapters featuring timing-safe cryptographic **HMAC-SHA256 signature verification** and database idempotency guards to eliminate duplicate order fulfillments, verified with 100% Jest test coverage.
- Quantified Results:** Supported diversion of **1.2M+ single-use plastic bags**, achieved sub-2-second proforma generation turnaround, and reduced courier misdirection rate to under 2%.

TECHNICAL PROJECTS & ANALYTICS (CONTINUED)

REGALFRONT Consultancy PLC: Full-Stack Production Web Platform

CLIENT SOLUTION

PHP, MySQL, JavaScript, Tailwind CSS, PHPMailer, Google Analytics 4 | Live: regalefrontconsultancyplc.et

- Designed, developed, and deployed an end-to-end production web solution for an Ethiopian strategic management advisory firm serving NGOs, UN agencies, and government bodies.
- Implemented secure inquiry routing with server-side validation, PHPMailer SMTP automation, and an authenticated administrative portal for reviewing inbound strategic proposals.
- Configured and verified Google Analytics 4 (GA4) custom event tracking for form submission conversions alongside Google Search Console indexing.

COVID-19 Global Data Analysis (Cross-Source Reconciliation)

BI & ANALYTICS

SQLite, Power BI, Python (pandas/Matplotlib), Excel | GitHub: github.com/yordanos-ketema/covid-data-analysis-portfolio

- Queried and reconciled 150.5M+ global infection and mortality records across 210 countries from Our World in Data (Jan 2020 - Apr 2021).
- Formulated 14 analytical SQL queries utilizing Common Table Expressions (CTEs), window functions (SUM OVER PARTITION), and views to eliminate cumulative continent-level double-counting across all reporting layers.
- Constructed formula-driven Excel models (SUMIFS, MAXIFS, INDEX/MATCH) and an interactive Power BI star schema report with custom DAX aggregations.

Ethiopia & East Africa Macroeconomic Analysis

MACROECONOMIC MODELING

SQL, Excel, Python (pandas), Power BI | GitHub: github.com/yordanos-ketema/ethiopia-east-africa-analysis

- Unified multi-vintage World Bank development indicator tables for Ethiopia, Kenya, Uganda, Tanzania, and Rwanda, computing precise per-capita figures across mismatched reporting vintages.
- Built an exploratory Python demographic model comparing linear trend projections against Compound Annual Growth Rate (CAGR) curves.
- Developed a Power BI dashboard utilizing DAX LASTNONBLANK calculations to handle non-uniform reporting intervals cleanly.

METHODOLOGIES & REGULATORY FRAMEWORKS

Tax & Regulatory Compliance:	Ethiopian Ministry of Revenues (MoR) 15% VAT Statutory Rules, 2% Withholding Tax Deductions, Buyer Tax Identification Number (TIN) Verification, Proforma Invoicing Validity Periods.
Operations & Architecture:	First-In First-Out (FIFO) Perishable Dairy Stock Allocation, Recipe Bill of Materials (BOM) COGS Tracking, 5-Tier Landmark Addressing (11 Sub-Cities & Woredas), Turborepo Monorepo Architecture.
Testing & Quality Assurance:	User Acceptance Testing (UAT), Gherkin BDD Acceptance Test Scenarios, Jest Integration Testing, Database Idempotency, HMAC-SHA256 Cryptographic Timing-Safe Verifications.

EDUCATION

Bachelor of Arts in Business Administration & Information Systems

Addis Ababa, Ethiopia

[Addis Ababa University](#)

Integrated coursework covering Database Systems, Financial Accounting, Strategic Management, Enterprise Information Systems, and Quantitative Business Analysis.
